SOME CHANGES TO THE PRODUCTION OF YOUR NEWSLETTER

We are very thankful to both John Nunn and Peter Grunberg whom together looked after this for a long time. They indicated that a break was needed and resigned from their monthly “task”. We are also grateful that Neil Pollard and Tim Noble stepped in to assist in the production of the last couple of issues.

As we could not find any member who would be able and/or willing to take over this publication, then I offered to assist to the best of my capabilities, although with having average computer skills, but at least you will receive an ongoing publication which hopefully will grow into an improved quality month by month.

The item “around the ports” has momentarily been cancelled but may re-appear in similar style with reduced data. Please be patient.

The last newsletter by John and Peter, November 2017, is of exceptional good quality and it will take quite some time to meet such standard.

As the saying goes: We will do our best.
